CARL RESTAURANT

ABSTRACT:-

The carl restaurant is a online website for food .due to carona it is difficult to people to come out for the food. So customers order their food in this website and the cost is less when compared to others .we deliver the food on time with safety measures.

Different services given by application that makes consumers happy and satisfied .Comfort and Convenience which makes consumer more inclined towards online food ordering.

It shows about the restaurant how to order on online and delivery to home.

ACKNOWLEDGEMENT:-

I would like to thank my mentor – Mrs. Sheetal Chaunhan for his advice and inputs on this project. Many thanks to my friends and feedbacks.

INTRODUCTION:-

1. CONTENT

This project has been done as part of my course for the CSE at Lovely Professional University . Supervised by Sheetal mam.

2.Motivations

Being extremely interested in everything having a relation with the html for creating websites , the group project was a great occasion to give us the time to learn and confirm our interest for this field.We can use programming in Finance, Medicine, almost everywhere. That's why I decided to conduct my project int html..

Work Flow:

Phase 1: Gather Information and Define Scope

1. Gather information: Collect data about the restaurant, including its name, location, cuisine, target customers, and overall concept.
2. Define scope: Determine the specific aspects of the restaurant you want to focus on in your report, such as its menu, customer reviews, or online presence.

Phase 2: Develop HTML Structure

1. Create basic HTML structure: Begin by creating a basic HTML document with the necessary tags, such as `<!DOCTYPE html>`, `<html>`, `<head>`, and `<body>`.
2. Define sections: Divide the report into different sections using HTML elements like `<h1>` for headings, `<p>` for paragraphs, and `` for lists.
3. Include restaurant information: Add the gathered restaurant information to the appropriate sections using HTML tags.

Phase 3: Enhance with CSS Styling

1. Link CSS file: Link an external CSS file to the HTML document using the `<link>` tag.
2. Style headings: Use CSS selectors to style headings with appropriate font size, weight, and color.
3. Style paragraphs: Style paragraphs for readability and consistency.
4. Style lists: Style list items using CSS properties like margin, padding, and list-style-type.
5. Add visual elements: Enhance the report's appearance with appropriate images, icons, or other visual elements.

Phase 4: Implement Interactive Features with JavaScript

1. Include JavaScript file: Link an external JavaScript file to the HTML document using the `<script>` tag.
2. Create interactive elements: Use JavaScript to create interactive elements like buttons, menus, or dynamic content.
3. Add data manipulation: Use JavaScript to manipulate and present data from the restaurant, such as customer reviews or menu items.

4. Enhance user experience: Enhance the user experience by adding animations, transitions, or other interactive features.

Phase 5: Testing and Refinement

1. Test functionality: Thoroughly test the report's functionality across different browsers and devices.
2. Refine styling: Refine the CSS styling to ensure a consistent and visually appealing presentation.
3. Optimize performance: Optimize the JavaScript code to ensure smooth performance and avoid any potential issues.
4. Review and edit: Carefully review the report's content, formatting, and overall presentation.
